

## ABSTRACT

A problem to be solved by the invention is to provide a vehicle outside-image display apparatus that is capable of visualizing a visual field blocked by an obstacle. A vehicle outside-image display apparatus includes a  
5 vehicle outside-image capturing unit (114) adapted to capture an image outside the vehicle by a camera (111), an image receiving unit (116) adapted to receive vehicle outside-image information from outside, an image combining unit (118) adapted to combine the vehicle outside-image information received by the image receiving unit (116) with an image captured by the vehicle outside-image  
10 capturing unit (114), and an image display device (141) adapted to display renewed vehicle outside-image information produced by the image combining unit (118).
